

Poison Prevention Tips for Pet Parents

Pets are curious and we know that they tend to explore their worlds with their mouths! Review these tips that help prevent pet poisoning and keep your pet safe.

The kitchen may be where the family gathers, but it's also where you can find foods that are hazardous to cats and dogs.

Toxic Foods to Watch Out For

Be extra vigilant with the broom when these items fall on the floor, and make sure to store them securely in a high cupboard.

- Onions
- Garlic
- Grapes
- Avocados
- Raisins
- Chocolate (especially dark chocolate)
- Sugar-free treats or peanut butter containing xylitol

- Coffee
- · Cherry and apricot pits
- Macadamia nuts
- Caffeine
- Salt
- Apple seeds
- · Alcoholic beverages

What Else is Lurking Around the House?

It's not just food you need to keep an eye on. Keep these items out of reach too:

- · Essential oils, both diffused and directly applied
- Candles not made from soy or beeswax
- Human drugs or vitamins
- Rat poison
- Fertilizer
- · Cleaning products
- Poisonous plants

Poison Prevention Tips

Here's what else you can do.

- Teach your pet to stay out of the kitchen.
- Give them a job to do, like the "Place" command, when you're preparing meals.
- Supervise your pet at all times, especially if you've got a counter surfer. If you need to step out of the kitchen, put your dog somewhere safe like a crate.
- Make sure to clean up all remnants from the floor.
- Purchase safe alternatives when possible, like **peanut butter without xylitol.**
- If your dog has a habit of picking things up off the ground outside, you can keep him or her safe with a basket muzzle that allows proper panting but makes it more difficult to grab potentially dangerous items.
- Teach your dog the "out" or "leave it" command, which essentially means "drop whatever is in your mouth and disengage." This could be a lifesaver when it comes to toxic foods or choking hazards.

Poisoning Symptoms

Call your vet or head to the nearest emergency clinic as soon as possible if see any of these symptoms.

- Agitation, tremors and/or convulsions
- Vomiting
- Diarrhea
- Low energy
- Abnormal heart rate
- Drooling
- Nausea
- Pale gums

While you are getting your pet into the vehicle, have someone call Pet Poison Helpline on (855) 764-7661

If you know what your pet ingested/touched and you have a package/container, keep this with you as the helpline will need the details.

There is a fee for this service of around \$89 USD but your veterinarian will need the information that they provide in order to correctly treat your pet.

Things You Didn't Know Could Harm Your Pet

Make your home a safer place for your pets by keeping them away from the following hazardous household items, plants, foods, objects and trouble areas

Household Items

- Non-steroidal anti-inflammatory medications (ibuprofen, aspirin, etc.)
- Acetaminophen (Tylenol)
- · Cold and flu medications
